Work From Home – Cable Types & Connectors

DisplayPort Cable

Used for your Monitor Connection

VGA Cable

Used for your Monitor Connection

DVI Cable

Used for your Monitor Connection

USB Cable

Used for your Mouse & Keyboard

HDMI Cable

Used for your Monitor Connection

DVI to VGA Converter

Use – Allow VGA Cable to connect to DVI port

Ethernet Cable

Used for your Internet & Phone Connection
*Looks like regular phone cable but is larger
*Comes in different colors. Color does not matter

Router

Use – Provide Internet & Network Connections
*Routers will have different looks, but all have similar features. There will be one port (usually colored differently) that is for your Internet (WAN) cable and should already be in use. Then a number of additional ports (Ethernet/LAN) to connect computers & other devices.
